All panels are required to have these columns headers, be named the same, and be in this order. All files must be saved as CSV (Comma delimited)

Values always required	Values optional - These fields will appear on your CEND alerts if you include them in the panel	Values required for delta panels only	Provide these values if available	Values required for care alert panels
------------------------	--	---------------------------------------	-----------------------------------	---------------------------------------

Completing the Patient Panel Template properly for self-service processing via the Panel Processor application is key to reducing panel rejections, misidentification of patients, and loss of valuable time.

Required Fields	Notes
Patient_ID	Patient IDs cannot contain spaces or additional characters such as ('single quote, " double quote, / slash, \ backslash, % percent, < less than sign, > greater than sign, + plus sign, ? question mark, 'apostrophe, ' apostrophe, ` back-quote. Add numbers and/or letters as: 12345, 12345ABC.
First_Name	It is best to use a space between multiple first names, but do not replace apostrophes or other characters in the name with spaces to maintain the best chances at a phonetic match. If the patient uses a single letter as a name, spell it out (ex. "J" = "Jay"). Otherwise, the name will be considered anonymous.
Last_Name	It is best to use a space between multiple last names. If the name is hyphenated, please include the hyphen.

Here are some Best Practices, and Practices to Avoid, to help you complete your patient panel template more effectively:

Best Practices

- Ensure ALL column headers are included, named, and listed IDENTICALLY to the order on the patient panel template. We recommend copying & pasting your patient data into the template, so that the headers are already correct.
- Ensure your patient panel is named correctly. The file should be named in this format: subscribercode-1-z-MM-DD-YYYY. (Ex: ENS_VAL-1-z-02-14-2023).
- Ensure your patient panel is saved as a .csv file. (.csv, comma delimited).
- Ensure your patient panel reflects accurate data in ALL required fields. (Patient ID, First Name, Last Name, Address, City, State, Zip, DOB, & Gender).
- Ensure that there is no unnecessary or additional spacing within the cells.
- Ensure there are no duplicate patients.

Practices to Avoid

- Do not leave blank cells in the required blue highlighted fields.
- Do not add additional details (e.g., lives with wife, shelter, or likes to watch basketball) in Address 1 or Address 2 fields.
- Do not add additional characters in the fields. This includes *, /, (), etc. in required fields.
